

Additional Works Bulletin # 01 **Brentwood High Street – Improvement Works**

Incidental to the ongoing construction works, EDF Energy have given notice that the following works are necessary in order for them now to complete their cabling works to upgrade their network taking advantage of the ongoing construction works in High Street. This will also mean that the newly completed paving and surfacing will not have to be opened up in the near future to undertake this work.

For clarification, please note that the EDF works are not as a direct consequence of the Brentwood Town Centre Enhancement and Environmental Scheme, but have been found to be necessary following upgrading of supplies EDF have now committed to and the poor condition of the HV and LV mains cables that have been uncovered as their works have proceeded.

The work does, as noted, impact, on the completion of the paving works, but by undertaking it prior to the closure of the High Street from 5th October, it will have minimal influence on the completion of the main contract works.

The works involved are: -

Kings Road, east side, south for 25 m, in footway, linking to ducts laid in Phase 1 of the scheme. Traffic in Kings Road north bound will be confined to one lane for a short section leading up to the traffic lights at the junction with High Street, to allow traffic displaced southbound for pedestrians to be accommodated in the carriageway.

High Street, north side footway, south of Weald Road, from 151a High Street passed Tower Street, Sovereign House and Stone Gallery, to just south of the junction with Westbury Road. Single lane working under traffic control, during off peak periods, as noted below. Pedestrians routed in carriageway.

Working Times associated with EDF Energy works w/c 28th September 2009

- **Monday 28/09/09** - **07.30 hrs to 18.00 hrs**
(Kings Road)
